Entry Level Software Engineer

Employment Type: Full-Time

Compensation: Negotiable

Benefits Offered: Medical, 401K, Performance Bonus

Location: Milford, OH

Integrated Test & Measurement (ITM) is a structural test & measurement engineering service and software company located in Milford, OH that helps companies reduce costs and improve efficiencies in their product development, manufacturing, and production activities. ITM provides software development, structural and mechanical testing services, industrial monitoring, strain gauging, and data analysis solutions to clients around the globe. ITM is a recognized National Instruments Gold Alliance Partner.

We are seeking a candidate to fill a full-time entry level software engineering position. The ideal candidate is a well-rounded and organized individual. That is highly analytical and enjoys tackling new problems regularly. The candidate will leverage their knowledge and experience to support our software team in various software development applications.

Education and Experience Requirements:

- Bachelor's degree in computer science, engineering, or a related field
- Experience with LabVIEW or comparable development software
- One year of experience in software development

About you:

- You are self-driven
- You are punctual and responsible.
- You take pride in your work and are obsessed with attention to detail.
- You find large challenges exciting and enjoy discovering and defining problems as much as solving them.
- You are excited to work with and learn from other skilled team members.
- You are a cross disciplinary team member.
- You are comfortable communicating ideas across teams.
- You deliver solutions that work.

About your role:

- Code and test programming for in-house software programs and projects
- Develop required documentation per company standards
- Ability to write clean, well-documented code
- Excellent problem solving and critical thinking skills
- Working knowledge of SQL and other database programs
- Demonstrated analytical and critical thinking abilities
- Must be willing to take on multiple assignments, prioritize and complete
- Troubleshoot system bugs and issues.
- Collaborate with product, design, and marketing teams.
- Provide technical support to resolve user-submitted problems and questions.
- Proficient computer skills (Windows and Microsoft Office products)
- Exceptional verbal and written communication skills
- Commitment to obtaining advanced software education and certifications

Must be authorized to work in the United States. ITM is not currently accepting work visas. Qualified candidates are asked to send resumes, cover letters, and references to:
