

Entry Level Engineer

Employment Type: Full-Time

Compensation: Negotiable

Benefits Offered: Medical, 401K, 401K Matching, PTO, Performance Bonus

Location: Milford, OH

Integrated Test & Measurement (ITM) is a structural test & measurement engineering service and software company located in Milford, Ohio, that helps companies reduce costs and improve efficiencies in their product development, manufacturing and production activities. ITM provides software development, structural and mechanical testing services, industrial monitoring, strain gauging, and data analysis solutions to clients around the globe. ITM is a recognized NI Systems Integrator.

We are seeking a candidate to fill a full-time entry level engineering position. The ideal candidate is organized and gets excited about building things. We want someone who is highly analytical and enjoys tackling new problems. This individual will assist in field operations as well as obtain hands-on technical experience in electric panel assembly, electronics and sensor instrumentation and structural testing.

Experience and Beneficial Skills:

- Bachelor's degree in Engineering discipline
- One (1)+ years of relevant work experience (Co-op or full-time)
- Experience in data acquisition, structural testing, and/or data analysis preferred
- CAD, programming, or database management knowledge preferred

About you:

- You are self-driven, a self-starter and a team player
- You are punctual and responsible.
- You take pride in your work and are obsessed with attention to detail.
- You find large challenges exciting and enjoy discovering and defining problems as much as solving them.
- You have a strong mechanical aptitude
- You are excited to work with and learn from other skilled engineers.
- You are a cross disciplinary team member.
- You have excellent communication and time management skills
- You deliver solutions that work.

About your role:

- Must be willing to take on multiple projects and assignments, prioritize and complete on schedule.
- Manage and assist in technical lab operations for system integration projects.
- Spend time learning technical skills, including hardware and software design techniques, software development and testing techniques, and system installation and checkout processes.
- Desire and ability to travel and work in challenging environments (travel 1/4 of time).
- Manage and assist in field operations including installation, commissioning and standby support.
- Field testing of mechanical and electrical equipment.
- Software and electrical system troubleshooting.
- Proficient computer skills (Windows and Microsoft Office products).
- Exceptional verbal and written communication skills.

Must be authorized to work in the United States. ITM is not currently accepting work visas. Qualified candidates are asked to send resumes, cover letters and references to:
